

Extreme duty high debris air cleaner.

Flexxaire® reversing engine cooling fan.

Hydraulic clutch- 600hp rating, unlimited re-starts.

Oil cooler with hydraulically driven cooling fan.

42 swinging straight hammers with tungsten carbide hardfacing.

Replaceable interference shear teeth with outside housing access. Replaceable angle shear bar.

Replaceable sizing screen.

8 5/8" diameter rotor, 7/8" wall thickness. Bolt-on 2 7/16" heat treated rotor shafts.

Rotor bearings- 27/16" double row spherical roller bearings with auxilliary grease seal.

Dual 6-groove 5VX belt drive with extra large polyester cords.

Electric brakes available as an option.

Hydraulically actuated lift axle.

21.5 x 16.1, 14 ply Forestry Tires on 15,000lb capacity hubs.

Cab mount controls- engine throttle; independent feed roll controls (on/off/reverse & rotation speed); clutch engage; emergency shutdown.

Engine controls and monitoring available at tractor seat.

3-point mounted high clearance hitch with 49,000lb rated pintle loop- pivot point located for minimum turning radius.

Tractor requirements- approximately 80hp engine; 2 sets of tractor remotes to operate lift axle and top feed roll height adjustment; 4 wheel drive; fully weighted front end.

Axle weight 17,000lbs; Tongue wt 1350lbs; Shipping wt 19,000lbs.

Torque setting for heavy brush conditions. High Speed/Low Torque setting for lighter brush and higher ground speed. Bot-

tom feed roll powered by 22gpm @ 3000psi open center circuit.
